3DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-20, 23 and 27-30 are rejected under 35 U.S.C. 102(b) as being anticipated by European patent document 0396207.

European patent document 0396207 teaches the invention as claimed including a medium or large diameter single-cylinder circular knitting machine, comprising a needle cylinder that has a vertical axis and a sinker ring that is connected coaxially to said needle cylinder proximate to the upper end of the needle cylinder, said sinker ring having a plurality of radial slots, each of which accommodates at least one sinker, wherein said sinker ring is arranged inside the radial dimensions of said needle cylinder, said sinkers having a beak that is directed toward the axis of the needle cylinder.

Allowable Subject Matter

Claims 21, 22 and 24-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
